Beloved Children:

I bring you greetings for the great Holy Day which has been given the beautiful name of Thanksgiving - the giving of thanks. With the great Helios and Vesta I represent one of the Hierarchy who are the recipients of the gratitude from all life for Our outpouring through Nature and the avenues that supply the energy to the people of Earth. This has been My great privilege for centuries.

At inner levels, the Thanksgiving Ceremony is celebrated by every Angel, Master, and Nature Spirit, and mankind is the beneficiary, for gratitude, or the pouring forth of Thanksgiving is one of the most glorious, uplifting and expanding expressions of Life. It gives, not only ease of mind and body and spirit, but it springs up in a limitless profusion of gifts wherever the attention directs its currents.

The giving of thanks is one of the most contagious expressions of spirit and unifying activities of God. It is an instantaneous transmutation of hard or discordant feelings, and it is a cosmic magnet that draws all good towards the generator of genuine Thanksgiving. So, dear ones, hesitate not to let your hearts sing THANKS for the blessed air you breathe, the water which cleanses, the humble Earth upon which you set your feet - yes, even for the hard cement of the city streets which support the weight of so many

uncomplainingly. If for, say three minutes daily, in this busy outer world, you will address your gratitude towards all Life everywhere, manifest and unmanifest, and to the heart center of all created beings, you will open channels through which returning currents of blessings will flow into your life -- for such is the Law. Habitual expressing of gratitude for the services of the elements in the body to his person will keep the individual free of illness of body. Gratitude for the God-Intelligence and Substance of Feeling loaned to him by the Cosmic Creator will keep the individual free of illness of mind or of upset emotions. Ingratitude of the masses has brought about all conditions of distress, and is a grave insult to Life which is constantly pouring its Gifts to man far beyond his merits.

Blessed friends, I say to you that many of you were embodied among those early pilgrims on the rugged Massachusetts shore; your inner selves can remember well the hardships of that new land. When the early forefathers first acknowledged Thanksgiving, they had merely tuned in to this Cosmic Day, for as you have been told, the Feast of Thanksgiving is a Cosmic Activity; and so you, dear ones, helped to inaugurate this Feast in America.

When a group of students is fortunate enough to secure the direct guidance of an Ascended Being, they become part of His Consciousness, and in reality, a living part of His very Being even as a child has a separate individuality but remains through life a part of the parents from whence it sprang. The student thus adds all the strength and good of his Causal reserve to the Master's great Consciousness and widens the

Master's field of service by providing another complete set of vehicles through which the Master may work; and in turn the student receives of the great store of the Master's Gifts and Light. So, My dear children, at this Thanksgiving Season, I render to you My sincere gratitude for giving Me your attention, and for permitting Me to serve you.

All My Blessings and Love be ever with you.

Blessed Ones desiring to Comfort Humanity:

I thank you for your willingness to let go of old concepts and desires folded away in the etheric garment for centuries in order that you can better serve in God's Plan, free from spiritual arrogance and intellectual pride, and so I humbly refer you to a description of the beloved planet Uranus.

MAHA CHOHAN

THE PLANET URANUS

Dear ones:

For a group to bring through from the Higher Realms those Truths which will be of benefit to the great minds that are to come in the future, it (the group) cannot work with the accumulations of the past; so I am grateful for your humility in choosing to draw forth Truth, even if it is discomforting to the outer consciousness.

Looking upon the planet Earth with inner sight, great tides can be seen of what We call psychic or astral matter. These are born in the mental and feeling worlds of the people on Earth. These tides are definite strata, and as everything works on vibration - water seeking its own level for instance - so do vibrations of a similar nature
